Hi Tech Thermoformers private limited, 61- Navdurga Industrial Park, At & PO : Sankarda , Ta & Dist. Vadodadra, Gujarat - 391350

The LARGEST Dome Manufacturer of BHARAT , in size , quality and quantity.

We are the only Thermoformers who don't even touch the sheet surface during production of the domes.

We have a range of DOMES starting from 150mm diameter to 2050mm diameter and versatility to work with toughest engineering plastics like ACRYLIC & POLYCARBONATE SHEETS.

We do take care of PYRAMIDS & SQUARE DOMES as well to satisfy all shapes, sizes and Types for ARCHITECTURAL range of requirement

One of the best configurations to bring in the Sunlight inside building that too without heat. This is SANDWICH construction of ROUND / SQUARE DOMES & PYRAMIDS.

One can control the percentage of light transmission in the building along with the control over heat by selecting type of polycarbonate sheets with which the Domes are manufactured. Any construction like Single Dome or Sandwich Dome can be designed to be opened manually / electrically with or with remote to evacuate the hot air from building.

This STEPPED FLANGE ROUND DOMES are Embossed / Diffused clear single polycarbonate dome in a manufacturing industry. The images are self explanatory to understand the gain inside the production hall. At the same time utmost care is taken to fix the domes with MS frames, if dimensions of standard dome sizes and openings are not matching.

These FLAT FLANGE ROUND DOMES manufactured from UV coated Embossed/Diffused Clear Polycarbonate sheets manufactured with Covestro Resin by industry giants like LEXAN & Saraswati Plastotech. These DOMES normally last for 10 years, if handled as per Fixing guidelines & Post Fixing maintenance guidelines provided by us.

These are FLAT FLANGE
CLEAR TRANSPARENT ROUND &
SQUARE DOMES & PYRAMID.

These products transmit 94% of light inside
the building and have 50 micron
UV coating on both the sides enabling life
span of minimum 10 years.

FLAT FLANGE PYRAMID

Size in mm A	Size in Inches	Clear Opening B	Flange C	Height D
600 mm x 600 mm	24" x 24"	500 mm x 500 mm	50 mm	150 mm
900 mm x 900 mm	36" x 36"	800 mm x 800 mm	50 mm	250 mm
1000 mm x 1000 mm	39" x 39"	900 mm x 900 mm	50 mm	275 mm
1200 mm x 1200 mm	48" x 48"	1100 mm x 1100 mm	50 mm	300 mm
1500 mm x 1500 mm	60" x 60"	1400 mm x 1400 mm	50 mm	375 mm
1800 mm x 1800 mm	72" x 72"	1700 mm x 1700 mm	50 mm	400 mm
2000 mm x 2000 mm	80" x 80"	1900 mm x 1900 mm	50 mm	550 mm
Note: (1) Domes and Square Dome's "Height" may vary (+ / - 20 mm) (2) Prices are subject to change without prior notice.

Guide lines to Install & Maintain Polycarbonate Domes

INSTALLATION		
Points	Do's	Dont's
Handling	• Put Soft Foam layer between two Domes • Limit Staking on each other up to 10 domes only • Pack in wooden crates only • Do not forget to mark FRAGILE & THIS SIDE UP on packets	• Avoid hard objects to come in contact with. • Avoid Rubbing of Domes with another Domes/objects. • Avoid throwing free handedly.
Protective Film / Masking	• Keep the protective film / masking intact until the installation is done.	• Don't keep protective film/masking within 2 days of installation
Drilling	• Make at least 4mm oversize notch free compared to screw size by using drill machine.	• Avoid making hole with self drilling screw.
Washer & Rubber Gasket	• Put a strip of soft rubber (EPDM) in between RCC surface/ Metal Frame and dome. • Use EPDM bonded SS washers. • Ensure throughout base availability to the Dome flanges.	• Avoid direct contact of Domes with RCC / Metal surfaces • Avoid any other messy fitting methods like tying with wires and hammering the nails.
Tightening of screw	• Tighten the screw up to gentle push limit only.	• Do not over tighten the screws.
MAINTENANCE		
Points	Do's	Dont's
Cleaning	• Remove dirt/dust by spraying tap water mixed with shampoo and wipe out by soft cloth.	• Do not scrub the dome with scrubbers/hard objects. • Do not wash with any chemicals.
Sealing / Water proofing	• Use acetic cure transparent sealants of a reputed manufacturer only	• Avoid using conventional materials like cements/ M seals / Araldite / FRP coating for water proofing / sealing • Avoid using chemicals / resins, might result in cracking / yellowing of domes
